Bachelor in Computer Engineering

Ten Plus Two (+2) Science

I am a dedicated computer engineering student skilled in Python, C, and C++, with beginner-level proficiency in Java. I've developed two projects and one is ongoing. My projects have strengthened my skills in web development, coding, and problem-solving. I am committed to continuous learning and staying updated with industry trends. I'm eager to contribute to software development and back-end programming projects. I am open to internships and part-time roles, I'm confident my skills will make a valuable contribution to any team. I bring a positive attitude and motivation to the team.

- Developing a cross-platform mobile application that uses Flutter and Dart to calculates weight to protein ratio with calorie intake.
- Integrating a custom AI powered chatbot models to motivating messages and question related to their workout and nutrition.
- Implementing machine learning models to enhance data accuracy and deliver personalized fitness recommendations.

- Developed a fully functional ecommerce website tailored for retail sale of sports product.
- Built the backend using Django, implementing secure user authentication, order management, and payment integration.
- Designed a responsive front-end with HTML, CSS, and JavaScript, ensuring a seamless user experience across various devices.

- **Skills:** C/C++, Python, Django, Data Mining, Problem Solving, Big Data, AI/ML
- **Languages:** English, Nepali
- **Interests:** AI&ML
